WR-ON / WR-OFF

[TBD] change this to SCH-ON and SCH-OFF

WR-ON

Purpose: To find when a schedule (weekly routine) is set to come on.

Format: WR-ON(expression1 , expression2)

Description: expression1 = schedule number (1-16)

expression2 = which on event in the day (1-4)

Example: 10 VAR1 = WR-ON(1 , 1)

WR-OFF

Purpose: To find when a weekly routine is set to go off.

Format: WR-OFF(expression1 , expression2)

Description: expression1 = routine number (1-16) expression2 = which time off (1-4)

Example: 10 VAR1 = WR-OFF(1 , 1)
