Temco Platform

Temco Platform · built Nov 12, 2026

Temco Platform

The authoring application: how a project is made, how its site is built, and how it reaches the site you are reading.

Contents

- The catalog
  - The local assistant and its MCP server
- Entry points
- Platform introduction
  - Modules
    - `temco-ai`
    - Temco Docs — documentation
    - temco-editor
    - `temco-projects`
    - `temco-repositories`
    - `temco-store`
    - `temco-tools`
    - `temco-ui`
    - `temco-workbench`
- Naming
- TEMCO Platform — Engineering Design (Revision 2)
- Temco Platform — architecture
  - The application flow
  - Authoring parity with Dr.Explain, publishing parity with MSDN
    - Architecture
  - The application window
  - Support intake — engineering
    - Extension design
  - The application: shell, screens and flow

- Support intake from T3000
  - The registry the module reads
- The authoring flow
- The editor
- The platform
- Docs center: the redesign
- Shell and pages, v2 — the full layout, drawn
- The front page — the Azure portal's palette and scale
